NOTE: During 2001, Worldcom was included as part of a financial study of the Depreciable Lives of its telecom clients. Worldcom was generally in line with other telecom in the industry except for several long lived fixed assets such as under sea cable and Transmitters equipment. The company believes these assets lives to be adequate and not excessive due to the nature of the assets and the lack of any replacements for the types of assets in the near future.

WA 101  
NAS  
10/31/01

THE FOLLOWING INFORMATION WAS OBTAINED FROM EDGAR ON-LINE

WorldCom

PROPERTY AND EQUIPMENT:

Property and equipment are stated at cost. Depreciation is provided for financial reporting purposes using the straight-line method over the following estimated useful lives:

Transmission equipment (including conduit).....	5 to 45 years
Communications equipment.....	5 to 20 years
Furniture, fixtures, buildings and other.....	4 to 40 years

The Company evaluates the recoverability of property and equipment when events and circumstances indicate that such assets might be impaired. The Company determines impairment by comparing the undiscounted future cash flows estimated to be generated by these assets to their respective carrying amounts. In the event an impairment exists on property and equipment attributed to WorldCom group, a loss will be recognized by WorldCom group based on the amount by which the carrying value exceeds the fair value of the asset. If quoted market prices for an asset are not available, fair market value is determined primarily using the anticipated cash flows discounted at a rate commensurate with the risk involved. Losses on property and equipment to be disposed of are determined in a similar manner, except that fair market values are reduced for the cost to dispose. Maintenance and repairs are expensed as incurred. Replacements and betterments are capitalized. The cost and related reserves of assets sold or retired are removed from the accounts, and any resulting gain or loss is reflected in results of operations. The Company constructs certain of its own transmission systems and related facilities. Internal costs directly related to the construction of such facilities, including interest and salaries of certain employees, are capitalized. Such internal costs were \$305 million (\$195 million in interest), \$625 million (\$339 million in interest) and \$842 million (\$495 million in interest) in 1998, 1999 and 2000, respectively, and have been allocated to WorldCom group.

AT&T

Property and Equipment:

Property and equipment, including significant improvements, is stated at cost. Depreciation is computed on a straight-line basis using estimated useful lives of 3 to 20 years for support equipment and 10 to 40 years for buildings and improvements.

Sprint

Property, Plant and Equipment:

Property, plant and equipment is recorded at cost. Generally, ordinary asset retirements and disposals are charged against accumulated depreciation with no gain or loss recognized. Property, plant and equipment is depreciated on a straight-line basis over estimated economic useful lives. Repair and maintenance costs are expensed as incurred.

RMS  
JML

Williams Communications Corp.

PROPERTY, PLANT AND EQUIPMENT:

Property and equipment is recorded at cost. Depreciation is computed primarily on the straight-line method over estimated useful lives.

Depreciable Lives:

Fiber	25-30 Years
Optronics	7-10 Years
Right-of-Way	20-40 Years
Computer equipment	3 Years
General office furniture and fixtures	3-5 Years
Buildings and leasehold improvements	30 Years or life of lease

Qwest Communications Corporation, Inc.

Property, Plant and Equipment:

Property, plant and equipment is carried at cost and is depreciated using straight-line group methods.

Generally, under the group method, when an asset is sold or retired, the cost is deducted from property, plant and equipment and charged to accumulated depreciation without recognition of a gain or loss.

Leasehold improvements are amortized over the lesser of the useful lives of the assets or the lease term.

Expenditures for maintenance and repairs are expensed as incurred. Network construction costs, including interest during construction, are capitalized.

 Depreciable Lives Comparison  
 A: 12/31/2001

<u>SAP Description</u>	<u>Category</u>	<u>2000</u>	<u>2001</u>	<u>Reason for Change</u>
Intercountry Agreements	Intangible	Contract Term	3	Per discussion with Kevin Brumbaugh, Intercountry Agreements have historically been depreciated over the life of the agreement, but the company has decided to assign an average life to these agreements of approximately 3 years, based upon historical contracts. PFW reasonable. TAM
PC Software	Software		5 6	Per discussion with Kevin Brumbaugh, the change in life was made to make the depreciable lives of purchased software consistent with internally developed software. PFW reasonable. TAM
Capitalized Interest	Transmission		8 15	Per discussion with Kevin Brumbaugh, the change in useful life on transmission equipment capitalized interest was to make capitalized interest on this type of asset consistent with the depreciable life of the asset. PFW reasonable. TAM
Leasehold Improvements- Communication	FFE		20 7	Per discussion with Kevin Brumbaugh, this asset class is no longer used and the last posting of any asset to this asset type was 7/98, prior to the MCI WorldCom merger. As asset class is no longer used and inactive in SAP, PFW. TAM
Tymet Engines	FFE		4 5	Per discussion with Kevin Brumbaugh, this asset class is no longer used and no asset with this description is maintained on the books. PFW. TAM
